Pass It Along

Naval Aviation News is designed primarily to disseminate useful information and to expand the professional knowledge of all who serve in the Naval Aviation community. Each copy is intended to reach 10 readers, so please pass this one along.

Corrections: On page 38 of NANews, November 1982, two errors appeared in the list of U.S. space flights with Navy personnel. The notation "First flight to the moon" should have been noted under Apollo 8 vice Gemini VII; the "First walk on the moon" took place during Apollo 11 instead of Gemini VIII.
